

Nippon Express Vietnam

Song Than Warehouse, Di An District, Binh Duong, Vietnam

JOINTECH

YOUR TRUSTED SOLUTIONS PROVIDER BEYOND SECURITY

Industry: INDUSTRIAL

End User:

Nippon Express Vietnam is an all-round shipping company focusing on low-cost, large-volume cargo utilizing ships designed especially for certain shipments and high-speed container ships, which is known for its speedy and secure service.

The company is developing a service to support the burgeoning ASEAN economic zone, while establishing a logistics system to meet the rising domestic demand in India, the region's largest economic zone. The company helps its customers optimize their supply chains with their unique services.

Business Objective:

In order to provide the logistics facility fit for an international scale and capable of hosting the full range of leading express solutions for local and international customers, Nippon Express Vietnam was seeking high quality technological products to deploy throughout their facility. Their main interest was to integrate an access card control system into their current security surveillance network.

Solution:

To suit the clients' demands, HID Readers were specifically selected to be deployed throughout the facility. The system provides a complete overview of time attendance management of what is happening in the premises at all times. Certain employees are granted access into special sensitive areas, while others are not. The system can also be easily extended, and provides ease of use for its various functions and unique features. The HID system is further complemented with the ideal state-of-the-art access control system.

Key Success Factors:

- * High System Reliability
- * Unique Technical Service Features
- * Product QUALITY
- * Financial Advantages
- * Secure Issuance
- * Contactless
- * Encryption

ACCESS CONTROL

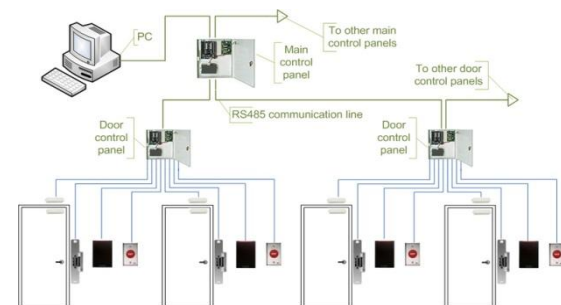

(Nippon Express Vietnam – Logistic Facility)

Access Card Control System: 18 Doors

9 – Sets Asis Controller ACU205

18 – Sets HID Reader 6005

2 – Sets BF450 Converter 485 to IP

Result:

The system facilitates the access of personnel and watch over movements of employees and freight. The installed solution provides easy staff management. Moreover, operational ease for multiple staff handling different shift duties was given. The benefits of the newly installed HID system exceeds the user end's expectations.

Software upgrade and maintenance are currently reoccurring yearly at the premises.

Sapporo Vietnam Brewery

Duc Hoa District, Long An Province, Vietnam

Industry: INDUSTRIAL

End User:

The Sapporo factory is built on an area of 6.5 hectares in Viet Hoa-Duc Hoa Industrial Park, Duc Hoa District, Long An Province. The Brewery plans to have production capacity of 40 million liters per year in the first phase, 100 million liters per year in the second phase of (2015) and up to 150 million liters per year during (2019).

Sapporo produces many different selections of premium beers and drinks. The outstanding flavor of Sapporo Premium Beer is meticulously made from the blend of the finest ingredients, highly-selected yeast, advanced production skills, and one-of-its-kind technologies along with the stringent quality control system standards from Japan in every step of the brewing.

Business Objective:

A deployment of a modern easy to use access control system with superior intelligibility and a accompanying central management software is to be used. The most important objective for this project was employee safety, as well as the safety of the entire factory. The facility consists of other several buildings that needed to be connected on one management system. The main challenge is to implement the factories current wiring structure with integration of the systems controller.

Solution:

A complete access card solution system was offered consisting of multiple controllers and readers that integrated together with the factories electrical platform. Given the breweries complexity, several areas where a risk of contamination exists are also protected. At the specific request of the client, the systems controller is to be left open ended for future expansion. All the events recorded from the provided access control system are monitored in the 24-control room of the factory.

Key Success Factors:

- * High System Reliability
- * Unique Technical Service Features
- * Product QUALITY
- * Financial Advantages

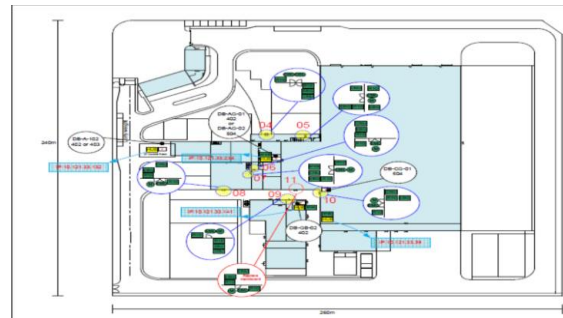

ACCESS CONTROL

(The Sapporo Vietnam Brewery Factory – Long An)

Complete Card Access Control System:

- 13 – Sets Controller ASIS ACU205
- 26 – Sets HID Reader R10
- 3 – Sets BF450 Converter 485 to IP
- 1 – Set Management IBSS Software

Result:

The factory has a complete solution installed protecting its facility from any unauthorized entry. All hazardous threats have also been reduced.

Peripheral elements are compatible with future installations. Due to the extreme reliability of HID products, the client experiences long-term financial savings because service is kept to a minimum.
