YOUR TRUSTED SOLUTIONS PROVIDER BEYOND SECURITY

**Industry:** RETAIL

## End User:

Puma is a major German multinational company that produces athletic and casual footwear, as well as sportswear, headquartered in Germany. Puma's offices and factories are worldwide serving to international customers globally.

In Vietnam, Puma products are created using a blend of strong and quality materials while keeping costs low. The factory is in full operation daily that outputs multiple products such as bag, clothing wears, exercise gear, shoes, and much more. Puma employs more than 10,000 people worldwide and distributes its products in more than 120 countries. For the fiscal year 2012, the company had revenue of over 1.5 billion dollars. Puma's stands by its brand and caters to its customers with excellence.

## Business Objective:

The client has requested an installation of the latest access control system to be implemented at their factory office premises. Devices that do much more than authentication was needed. To manage employees, visitors, factory workers better, and protect important areas, planning areas, research and design labs, the company is highly motivated in deploying a physical management system. All the security aspects were taken into account with high priority with the choices available during selection.

## Solution:

The beautifully constructed office space allowed a biometric system to be blended in effectively. The installed access control system comprehends the Suprema reader with the ASIS controller supporting the back end. The component itself is self-working and facilitates a secure entry and exit of authorized personnel. Regarding the regional factory office, high technology access equipment ensures precise employee and visitor movement.

## Key Success Factors:

- \* Secured Encrypted Access
- \* Affordable System
- \* Concealed in Environment

( PUMA Office – Inside Industrial Building )

## Biometric Access Control System:

7 – Sets Suprema Finger Print Reader

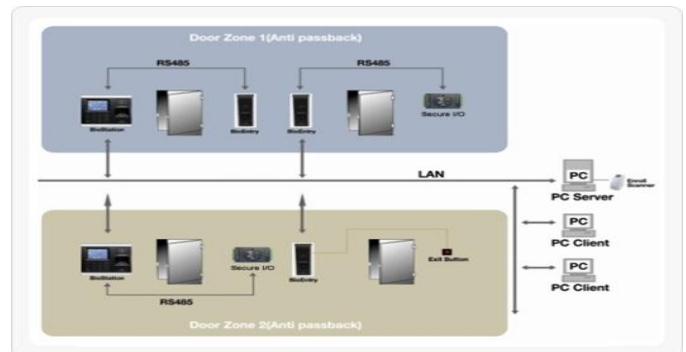

4 – Sets ASIS Controller ACU205

1 – Set BF450 Converter 485 to IP

1 – Set IBSS Software Management

## Maintenance:

Location is currently receiving ongoing yearly service

## Result:

All inside and outside areas of the office building including the most critical points is biometrically protected which ensures high security. The reliability provided by the central equipment and its numerous smart options allow complete interaction with selected individuals. This assures a safe and pleasant work environment for the factories workers and its visitors.
